

Species in the *In Situ* Research Role**1 species**

Species that for one or more reasons require further *in situ* research to be carried out as part of the conservation action for the species. One or more critical pieces of information is not known at this time.

Species	Extinction Risk	Threat Mitigation	Protected Habitat	Population Recovery	Over-collection
<i>Eleutherodactylus portoricensis</i>	Critically Endangered (CR)	Threats cannot/will not be reversed in time	Yes	Unknown	No
Coquis are the national emblem of Puerto Rico and are therefore culturally significant. The remaining population is in protected areas, although the species is rare in this area (R. Joglar, pers. comm. March 2011). Good for education purposes as it has dramatically reducing distribution and only found in cloud forest area (R. Joglar, pers. comm. March 2011).
