

2008
Year of the Frog

January 2, 2008

Dear Friends,

I really love frogs. Frogs help all of us by eating insects and doing other good things. Now, scientists have learned that many frogs are dying. They think 1/3 to 1/2 of the world's frogs may soon become extinct.

Instead of buying me a birthday present, please just donate a little money to help save the frogs that are dying. You can have your parents donate a small amount to www.amphibianark.org. Or you can bring a small donation to my birthday party instead of bringing me a present.

I really want to help the frogs. So instead of giving me a birthday present, please consider helping the frogs. That would be better than a present for me. You would be helping the frogs too.

Your friend,

Joseph
